PROFESSIONAL SUMMARY

Software Engineer Trainee with 1 year of experience in enterprise application development, backend engineering, testing, and debugging. Hands-on experience building Java-based web applications using Servlets, JDBC, JavaScript, Apache Tomcat, and SQL. Strong foundation in Object-Oriented Programming, Data Structures & Algorithms, SDLC, code quality, software testing, and scalable application development. Experienced working in Agile environments and collaborating with cross-functional teams.

TECHNICAL SKILLS

Programming: Java, SQL, JavaScript, Python (Basic)

Web Technologies: Servlets, JSP, HTML, CSS, REST APIs

Servers & Tools: Apache Tomcat, Git, GitHub, Jira

Database: JDBC, SQL Server, MySQL, Stored Procedures

Testing: Unit Testing, Functional Testing, Regression Testing, Debugging

Core CS: Data Structures & Algorithms, OOP, SDLC, Design Patterns, Problem Solving

PROFESSIONAL EXPERIENCE

Software Engineer Trainee | Novac Technology Solutions | Jul 2025 – Present

- Developed and maintained enterprise applications using C#, .NET, ASP.NET, and SQL Server.
- Designed and consumed REST APIs for integration between applications and backend services.
- Wrote optimized SQL queries, stored procedures, and database validations.
- Troubleshoot and resolved application defects, improving reliability and stability.
- Participated in Agile ceremonies including sprint planning, stand-ups, reviews, and retrospectives.
- Collaborated with developers, QA engineers, and stakeholders to deliver business requirements.
- Performed unit testing, functional testing, and regression testing.
- Utilized AI tools for debugging, code reviews, and productivity enhancement.
- Followed coding standards, version control practices, and peer-review processes.

PROJECTS

Banking Management Web Application (Java)

- Developed a secure banking web application using Java Servlets, JDBC, JavaScript, HTML/CSS, and Apache Tomcat.
- Implemented account management, fund transfer, transaction history, and customer management modules.
- Designed normalized relational database schemas and optimized SQL queries for efficient data access.
- Built modular backend components following OOP principles and scalable architecture practices.
- Implemented validation, exception handling, authentication, and secure database connectivity using JDBC.
- Conducted testing, debugging, and code reviews to improve application stability, security, and maintainability.
- Ensured clean, readable, and well-structured code aligned with software engineering best practices.

ACHIEVEMENTS

- Solved 50+ Data Structures & Algorithms problems on LeetCode.
- Applied AI-assisted development tools for debugging, code reviews, and productivity improvement.
- Maintained a CGPA of 8.5/10 in Information Technology.

EDUCATION

B.Tech – Information Technology

Vel Tech Rangarajan Dr. Sagunthala R&D; Institute of Science and Technology

CGPA: 8.5/10 | 2021–2025

CERTIFICATIONS

- AWS Academy Cloud Foundations
- Java Programming Workshop
